

Recommended by lactation consultants. Loved by moms.

♥ At Mother's Milk Mate, we believe the most precious gift any mother can give her baby is breastmilk. It's the perfect food and the accepted gold standard.

♥ Breastfeeding mothers give their babies the healthiest start possible. The American Academy of Pediatrics support breastfeeding until age 2. Breastfeeding provides countless benefits to both baby and mother.

♥ In an ideal world, every mother would follow the AAP recommendations. However, the realities of returning to work, daycare, and others caring for baby can get in the way. At Mother's Milk Mate, we recognize that many mothers need to express and store their breastmilk and need the proper guidance and equipment to do so.

♥ That's where we come in. Mother's Milk Mate is the only breastmilk rack storage system where the freshest bottle of expressed breastmilk put in the rack always comes out first. It's perfect for organizing breastmilk in the freezer or refrigerator. Plus, Mother's Milk Mate is compatible with most major breast pumps. That means no losing valuable nutrients by transferring containers and no messy bags.

♥ Mothers pump, store and feed using the same bottle, which is BPA-free and recyclable.

♥ Do yourself a favor. Order the Mother's Milk Mate breastmilk storage system today. Because you deserve the very best... and so does your baby.
